

ADVANCED GUARDRAIL INSTALLATION
EASIER THAN EVER

The Permanent Advanced Guardrail guardrail for **SUPER** and **FRAMESCAFF** is placed on the top tube connector of a vertical frame from the lower scaffold level [1], the handle is released [2], the guardrail folded out [3] and latched in [4].

YOUR GUARDRAIL IS ALWAYS ONE LEVEL
AHEAD OF YOU

For the **RINGSKAFF** version, the PAG is hooked into the node point from the lower scaffold level and stabilised with a single-sided crank below [5]. Then it is folded out [6] and hooked in [7].

TECHNICAL DATA

System	Length (mm)	Weight (kg)	Article no.
RINGSKAFF	1572	10.67	E04RS1604
	2072	12.14	E04RS1605
	2572	12.54	E04RS1606

PAG for RINGSKAFF
and compatible
scaffold systems is
available in metric
and 07 dimensions.

PAG for SUPER
is available in metric
dimensions

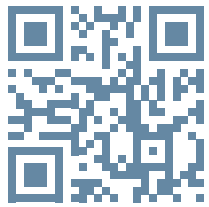

PAG for FRAMESCAFF
and compatible
scaffold systems is
available in 07 dimensions.

PERMANENT
ADVANCED
GUARDRAIL
for RINGSKAFF,
FRAMESCAFF
+ SUPER

SAFER SCAFFOLD ASSEMBLY AND DISASSEMBLY

With the Permanent Advanced Guardrail (PAG), you can safely and quickly comply with common safety guidelines for the assembly and disassembly of scaffolding. The PAG can be installed from the scaffold level below with a simple folding movement and remains in the scaffold as the guardrail for the entire standing time. Simply place it in your scaffold, fold it out, lock it in place and you're done.

SMART CLIP

DIMENSIONS: available from 1.5 m to 3.07 m

SAFETY: The cheapest and fastest way to comply to the safety guidelines TRBS 2121 and SG4

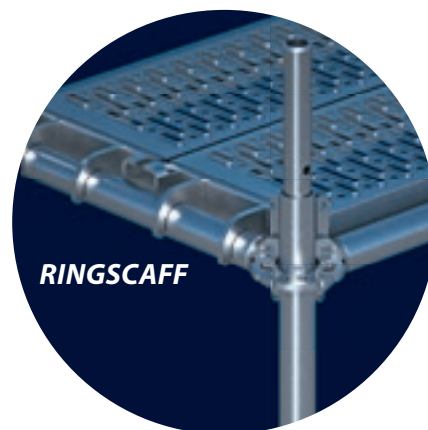

STANDARDS: EN 12811 & EN 13374

SYSTEMS: RINGSKAFF, FRAMESCAFF, SUPER and compatible

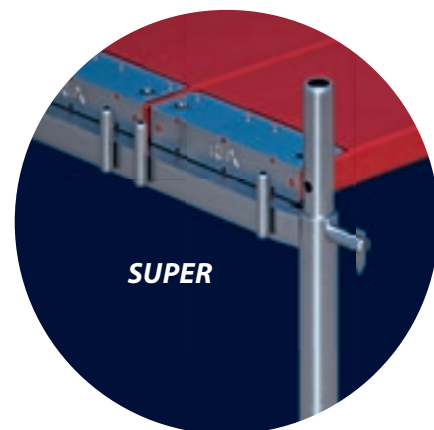

THE INNOVATIVE ADVANCED GUARDRAIL FOR YOUR SCAFFOLDING SYSTEM

The Permanent Advanced Guardrail is compatible with your RINGSCAFF, SUPER or FRAMESCAFF scaffolding system. So, you can simply continue to use the material that is already in your in-

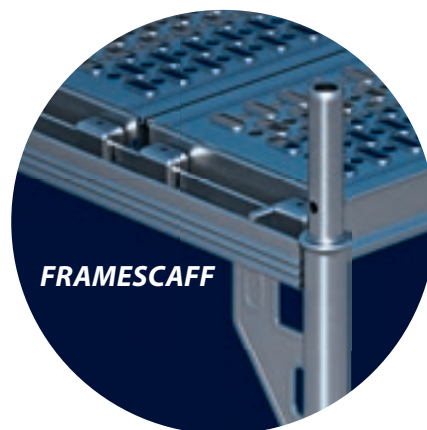

ventory. The PAG can be folded up at any time in any system variant and remains in its transport position on the scaffold standard.

RINGSCAFF

SUPER

FRAMESCAFF

PAG SINGLE-RAIL (Prototypes)

The single-rail PAG versions for SUPER and FRAMESCAFF are supplemented by system guardrails at knee height after assembly. Advantage: Less weight and therefore even easier handling, but still a secure position before climbing.

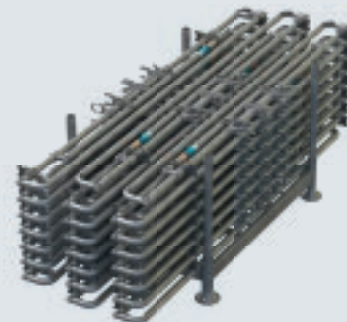

Safe scaffold assembly and dismantling

The PAG is assembled from the scaffold level below and thus complies with common safety regulations such as TRBS 2121 or SG4:22.

Low transport volume

The folding mechanism allows the PAG to be transported in a space-saving way.

Assembly from the in- and outside possible

The PAG can be assembled and disassembled from both inside and outside the scaffold.

Compatible

The PAG was developed for use with RINGSCAFF, FRAMESCAFF and SUPER scaffolds. This keeps the investment for system users particularly low.

SAFE ON ANY LEVEL: YOUR GUARDRAIL IS ALWAYS AHEAD OF YOU!

Foldable at any time

Even while the PAG is installed in the scaffold, scaffold bays can be opened as required. The PAG can be folded and remain on the scaffold in the space-saving transport position.

Faster assembly and dismantling

The folding mechanism makes the PAG particularly easy to handle. Assembly and dismantling can be carried out much faster than with alternative solutions.
